

PORTFOLIO

Design and Innovation

PURE AIR IS OUR PASSION

Smoke Solution, part of the Danish Longhi Group, has since its establishment in Denmark in the early 2000s created ground breaking, unprecedented solutions for indoor/outdoor smoking and air purification.

We have reached this level through a continuous commitment to our core values. Focus is on a balanced combination of superior product quality, safety and innovative Danish design hand in hand with modular functionality.

We are proud to offer solutions not only of the highest technical quality and safety, but also unique in flexibility, functionality and design. Truly, Danish design at its best!

Martin Longhi

CEO

OUR VISION, MISSION AND VALUES

The Foundation of All Our Indoor/Outdoor Smoking and Air-Purification Solutions

Vision

To be world leader of innovative, state-of-the-art solutions for indoor/outdoor smoking.

Mission

We develop, manufacture and supply state-of-the-art solutions for indoor/outdoor smoking.

- **Environment**
Eco- and People Friendliness – Sustainability – CSR
- **Professionalism**
Process – Elasticity – Integrity

DANISH DESIGN AT ITS BEST

*A System of Modular Cabins and Lounge Units
that Fit into Any Architecture and Interior*

By Danish Architect and Designer

Jesper Wolff

*"An exclusive high-end furniture, where smokers can
smoke while socializing with non-smokers.*

*The smokers must not be hidden away in a far corner or a
small closed room. They are to be treated with respect."*

Form and Function

Smoking cabins and lounges are rarely known for their architectural beauty and functional qualities. In the early 2000s we set out to change that. We teamed up with one of Denmark's most talented designers, architect Jesper Wolff, with the aim of making beautiful smoking cabins of superior functionality.

The result is a system of highly modular smoking cabins and lounge units that fit into virtually any existing architecture and interior design.

Quality and Safety

Superior engineering, craftsmanship, streamlined manufacturing and selection of the best components are the pillars of our high product quality. Meticulously designed, engineered and constructed with efficiency and longevity in mind.

All components from inside out are made using the finest, safest materials. From stainless steel and tempered safety glass to fireproofed ashtrays.

IT IS ALL IN THE DETAILS

*For us Danish Design is much more than
a beautiful appearance. It includes high
quality and safety standards ingrained in
the design. From large scale all the way
down to every single component.*

TESTED AND CERTIFIED

Our Products Are Continuously Tested, Approved and Certified by Independent, International Test Laboratories

Inside Out

Smoke Solution's cabins and units have been approved and certified by established, independent, international institutions regarding fire safety and level of filtration of gases and particles.

Continuous testing furthermore guarantees that our products live up to their high standard every time.

CERTIFICATION

ISO certification: ISO 9001 and ISO 14001. Fireproof ashtray tested and certified by DBI - The Danish Institute of Fire and Security Technology. Tested and certified by IFA. CE certified according to DIN EN 13823, DIN EN 1364-1. Tested and certified by IFI

PROCEDURE

Testing and certification are thorough procedures to ensure that our products are according to the norms and standards.

SERVICED AND GUARANTEED

We Give Our Customers Peace of Mind - Guaranteed

Standard or Customised

We offer and recommend our clients to sign up for one of our efficient, reliable service and maintenance solutions. Our five standard packages are based on average usage and ensure continuous and hassle-free operation of your smoking cabins.

Should a problem arise it will be solved immediately by Smoke Solution's experienced technicians or certified partners.

We also offer customised solutions as well as one-time service and filter changes for clients who choose not to sign up for a regular service package.

Our five standard service packages designed to meet average cabin usage from low to highest level.

Life-Long Guarantee

All our service packages are combined with a lifelong performance guarantee.

Not only does this ensure seamless, uninterrupted performance, it also provides peace of mind for our customers.

INDOOR SMOKING CABINS

Atmosphere and Wellbeing for All

SP110 and SP160 Series

By focusing on atmosphere and wellbeing, our smoke cabins are building bridges between smokers and non-smokers allowing them to interact.

The benefits are plentiful. Producing clean air and eliminating passive smoking are only the main benefits. Other great benefits include time savings and cost reductions from shortened smoke breaks to better energy efficiency. Added to this are improved safety and fireproofing.

Starting from 2-4 users the units can be extended with additional modules. Ideally to be placed alongside walls. Sizes starting from 1.2 m².

MODULES

The modular SP110 and SP160 Series in OPEN, SEMI OPEN and DOOR configurations. Available in SINGLE and MULTIPLE cabin combinations. Shown in SEMI OPEN.

INDOOR SMOKING AREAS

For Multiple Users

SPArea Series

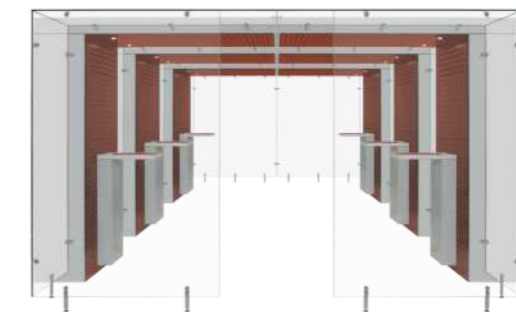

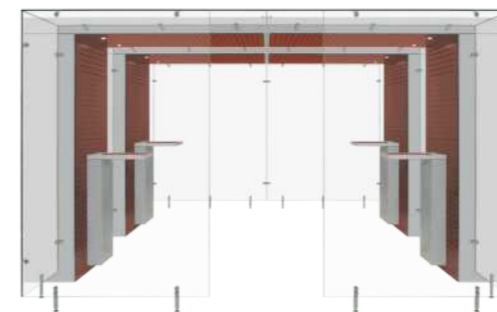

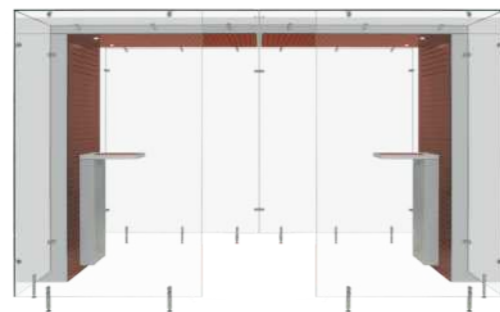

To accommodate larger groups of simultaneous smokers our smoking cabins can be combined in pairs with glass panels. The powerful filtration system ensures fresh air both inside and outside the cabin.

Our SP Area cabins provide a comfortable atmosphere with adjoining ashtrays allowing easy conversation among users. Starting from 10 users they can be placed freely either in the middle of open spaces or alongside walls and in corridors.

As such the SP Area cabins with their almost limitless combinations offer a flexible, efficient and attractive alternative to dedicated smoking rooms. Sizes starting from 6.7 m².

MODULES

Almost limitless combinations: SPArea Series shown in SINGLE, DOUBLE, TRIPLE and 2xTRIPLE configurations. Shown in SEMI OPEN.

OUTDOOR SMOKING CABINS

Setting an Innovative Standard for Outdoor Smoking

SQ Series

Our outdoor smoke cabins offer safe, convenient spaces for several smokers simultaneously. They follow the same strict design and manufacturing rules as our indoor smoking cabins including improved safety and fireproofing.

Furthermore, the same filters and spare parts are used making it convenient for customers having both our indoor and outdoor smoking cabins.

In sizes starting from 6.25 m² our outdoor cabins can accommodate 6-12 simultaneous users.

MODULES

Our outdoor SQ Series is available in several sizes and constructions ensuring hassle-free use under any climate conditions.

SMOKING ROOM AND LOUNGE UNITS

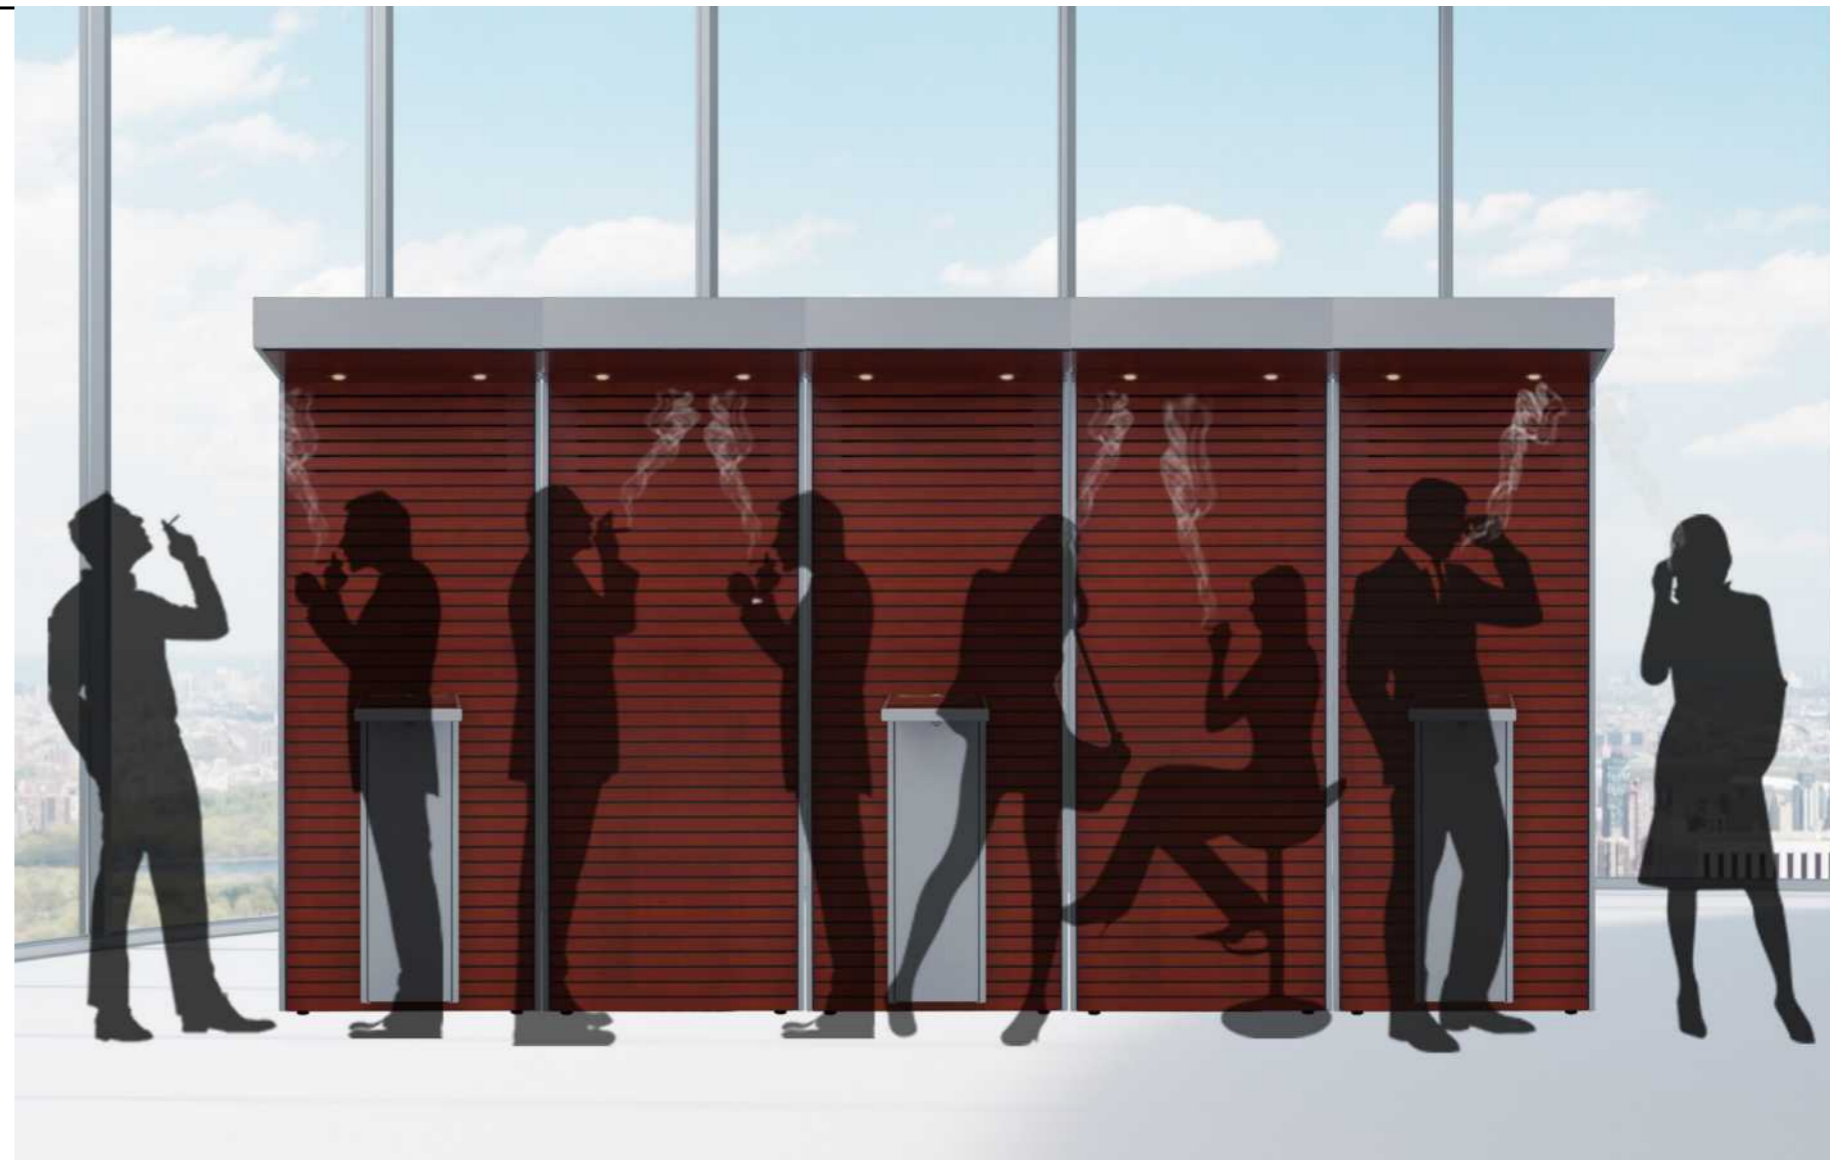

Almost Limitless Combinations to Fit Any Room

SR42 and SR65 Series

The heart of our smoking solutions is our effective filtering- and ventilation system, the centre piece in all our indoor/outdoor smoke cabins.

Conventional rooms for smoking are usually poorly ventilated, rarely cleaned and often an unpleasant place to be. Our room/lounge units provide an easy, effective and highly customisable fix to this problem.

The freestanding units offer almost limitless combinations and can be delivered with or without ashtrays depending on room setup.

MODULES

The possibilities are endless: SR42 and SR65 units shown as single modules with small/ large ashtrays and combined into clusters, pairs and smoking walls.

FIRE-PROOF ASHTRAYS

For Indoor/Outdoor Use

Our fire-proof ashtrays come in several sizes and designs. For mounting in the cabins as well as free-standing models in a variety of heights and materials for smoking lounges – indoor as well as outdoor.

ASHTRAYS

A selection of free-standing ashtrays for smoking rooms, lounges and areas - both indoor and outdoor.

ACCESSORIES

For Cabins and Lounges

The line of accessories contains both stand-alone and add-on equipment for use in lounge environments and cabins.

Furthermore, poster-prints can be applied to both inside and outside panels of the cabin units.

Poster-print applied to the exterior side panel of the SPArea cabin.

GRAPHICS

COLOURS

Wood, Metal and Backgrounds

Cabins are available in fifteen standard colour combinations. Special colours and customised illustrative decorations (company logos, shapes and fonts) can be supplied upon client request.

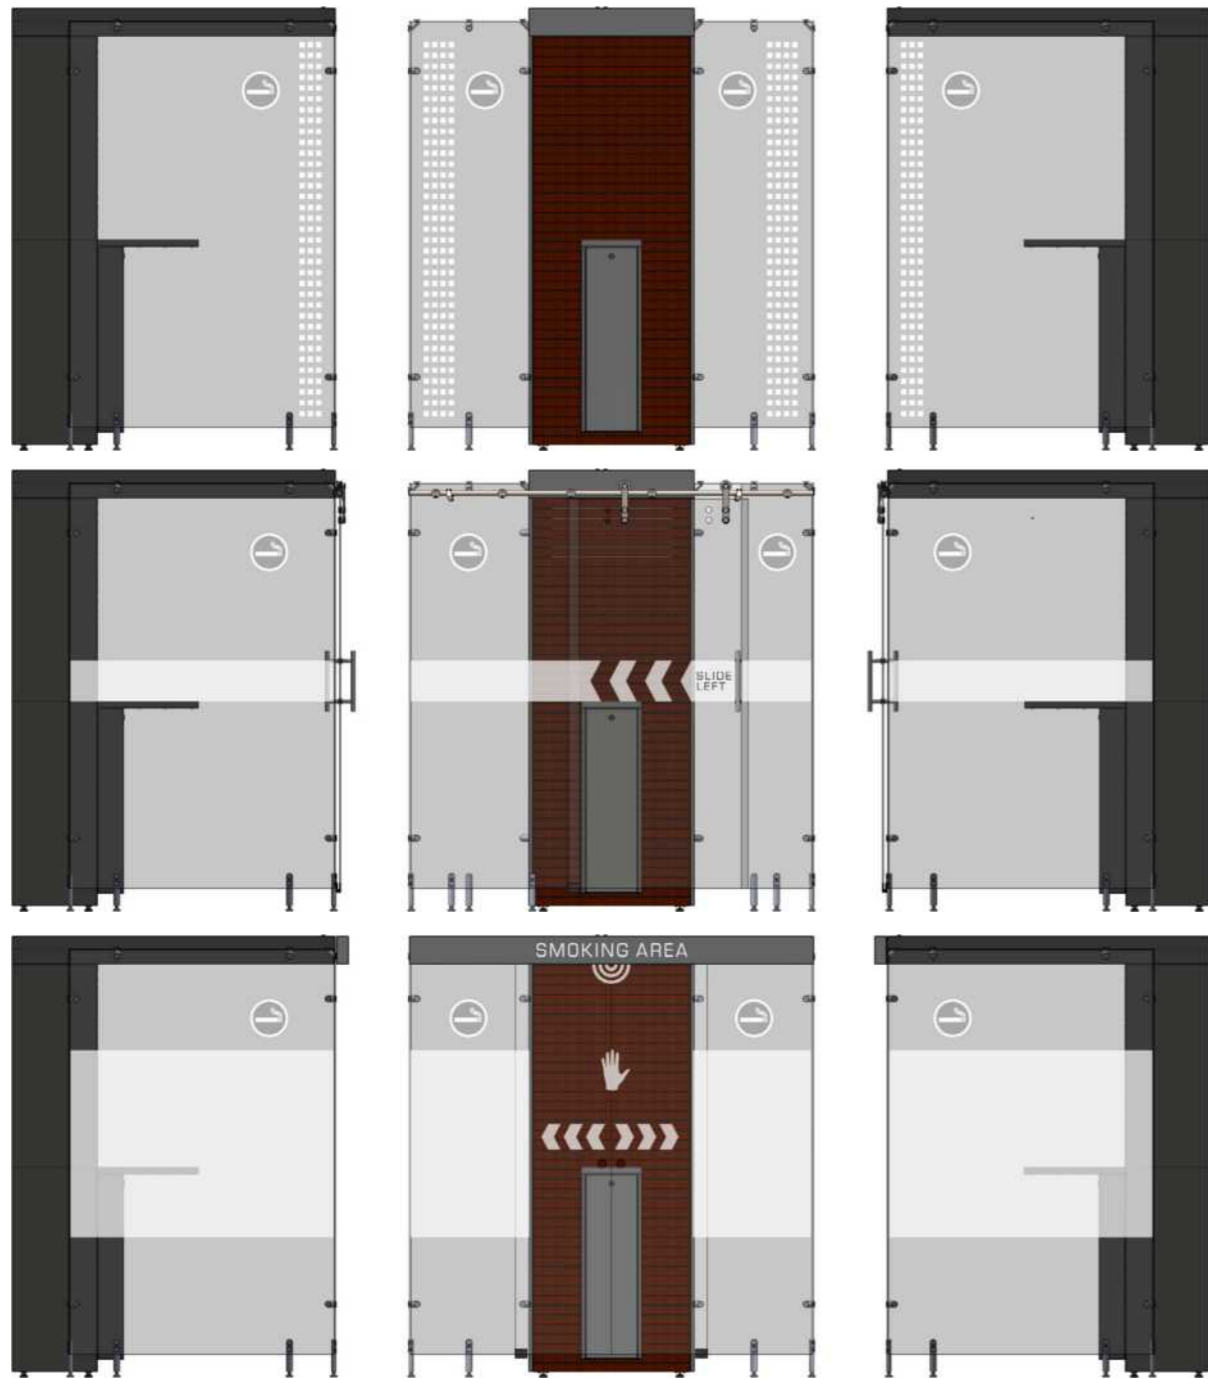

Opposite page: Our cabins and lounge units are available in three standard metal colours: Grey, black and stainless steel. Wood veneer: Mahogany, maple, white and black.

Below: Optionally, the panels can be decorated in a variety of designs and materials. For example, steel/mirror, in company colours with logos or symbols and with poster printed background images/adverts.

STANDARD

CUSTOMISED

STANDARD

Our standard print-designs available with pre-defined sets of symbols, text and backgrounds.

PRINTS

For Decoration and Wayfinding

All cabins are available with a range of standard prints and decorative elements. These too can be customised according to the wishes of our clients.

CUSTOMISED

Optionally, the cabin signage can be customised with client logos, patterns, symbols, text and colours.

IT IS ALL IN THE DETAILS

*A Look at the Features Behind
Our Design and Innovative Approach*

Easy Installation

Connection to ventilation system is not required. Only an electrical outlet is needed.

Extra Features

LCD-screen, foot-rest and custom print (logo and colours) are available upon request.

Vigorous Testing

Continuously tested by renowned test laboratories. Includes fire-safety and filtration.

Flexible Service

Standard and customised service levels set up to facilitate the actual cabin usage.

Global Certification

Approved and certified by independent global laboratories.

Fire Safety

All elements are fireproofed by using steel, glass and other hard-to-ignite materials.

Space saving Design

Compact, modular and freestanding units easy to install /relocate anywhere.

Lifelong Guarantee

With a service and maintenance solution comes a lifelong performance guarantee.

Quality Wood Veneer

Fire retardant MDF board. Ideal for use in public spaces with strict fire regulations.

Durable Metals

Powder coated steel. Stainless steel upon request.

99.95% Filtering

Pre- and HEPA-filters remove airborne particles. Activated carbon filters remove tobacco odour and gasses.

Safety Glass

Tempered safety glass panels. Other glass types and print upon request.

LED Lighting

Low consumption LED spotlights controlled by automatic motion sensors.

Fireproof Ashtray

Complete range of odourless and fireproof high-capacity ashtrays.

Low Noise Level

Comfortable, quiet operation comparable to a normal air-conditioner.

Powerful Fan

Adjustable high-capacity fan ensuring instant removal of smoke and circulation of clean air.

Low Energy Usage

All components have been selected from their high energy efficiency.

GLOBAL SOLUTIONS

Since the Beginning in Denmark Smoke Solution Has Been Adding an Edge to Indoor/Outdoor Smoking with Our Highly Innovative Solutions

Smoke Solution set out with a vision of creating the most innovative smoking cabins, and today we are among the largest manufacturers of superior quality solutions for indoor/outdoor smoking. We have worldwide representation and are a trusted supplier to thousands of customers globally in a broad variety of markets.

Our distribution network is fully developed and allows us to offer our products and services globally. Local distributors maintain customer care and relations in areas where we do not have offices ourselves. Our segments cover a broad range of markets. All our clients can be characterized by their need for and wish to be on the forefront of servicing their users, customers and employees.

- Main Offices
- Partners, Distributors and Installations

Airports

In airports passengers and staff can enjoy a pleasant, stress-free environment with our smoking cabins/room units.

Casinos

Our solutions help casinos and cruise ships to better accommodate both smoking and non-smoking guests while increasing revenue.

Hotels

Hotels and resorts with modern and flexible solutions for indoor/outdoor smoking make all guests feel at home – smokers as well as non-smokers.

Restaurants

To support the culinary experience and to offer good indoor air quality, we help eliminating passive smoking.

Malls

Malls and shopping centres who better accommodate both smoking and non-smoking customers experience increased revenue.

Offices

Our modern, uniquely designed smoking solutions are at work in numerous office environments globally. They enhance comfort for all.

Offshore

Offshore regulation of smoking is strict. Our modular smoking cabins offer specialised solutions in areas where fire, health and safety issues are a major concern.

Industry

Our space saving, freestanding smoke cabins help to a smooth regulation of smoking in production, warehouses and other industrial areas.
